Employment Projections by Industry & Occupation

This a program under contract with the U.S Department of Labor, Employment and Training Administration (ETA).

The projections are developed by Projections Managing Partnership (PMP), a partnership for states or territories of the U.S., to develop projections by industry and occupation, with a common methodology to be compared between states.

Two types of projections are produced: Short-Term and Long-Term Projections, by industry and occupation.

Short Term Projections

- Two year projections
- Annually produced
- An indicator that reflects seasonality and business cycle changes, and provides more timely information, to anticipate economic shifts in the coming months
- Mainly for job seekers

Long Term Projections

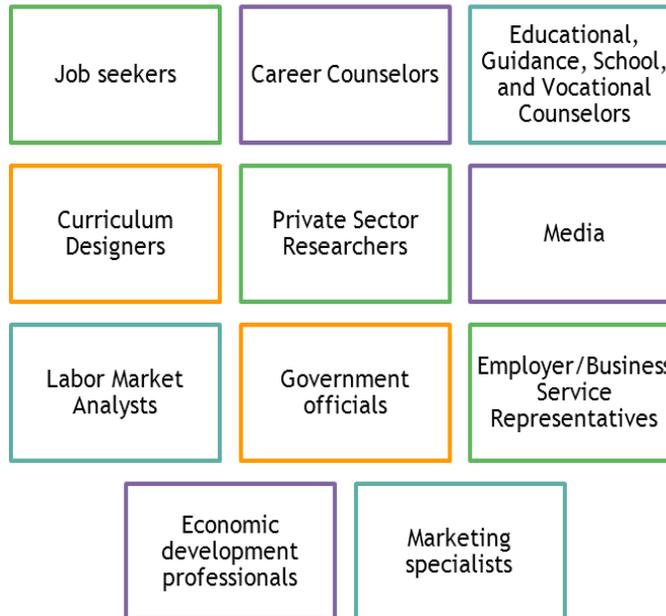

- Ten year projections
- Biannually produced
- Are strongly influenced by structural changes in the economy and population
- For people that make decisions and choose a career
- Generally used to evaluate and change academic programs, strategic planning, and planning educational programs

Projection Uses

Projection Users

Products - Projections by Industry

Industries gaining the most new jobs

Declining industries by net growth

Declining industries by percent growth

Fastest-growing industries

Products - Projections by Occupations

Occupations gaining the most new jobs

Declining or slow-growth occupations

Occupations with the highest growth rates by academic degree

Fastest-growing occupations
